

Community Climate Action Workshops:

Introduction to Climate Action (1 hour):

- Latest science on climate change,
- Observations of Traditional Knowledge Holders
- Insurance industry's increasing concerns
- Plans by various levels of government in Canada and elsewhere
- The GOA's Climate Action Plan and programs.
- Examples of process to install solar power

Our facilitators are available to help groups or individuals design and install solar energy.

Community Climate Action (2 hours):

- Develop your solar installation!
- 'Save the Future' format
- Achieve solar installations in community, either with groups or by individuals.
- Assessments for designing a solar installation,
- Preparing, distribution and evaluation of request for proposals,
- What sort of training can be provided by solar energy installation companies

Alberta 

Keepers of the Athabasca:

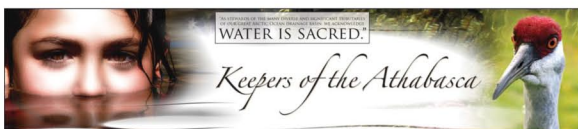

We are glad to help your community group, church, school, First Nation, Métis Settlement, club, or organization to develop a solar installation.

Please contact us to book a workshop
